

Clinical Geneticist Cover Letter

1312 Tiffany EstatesHermannshire, VT 02305

Dear Parker Pfeffer,

In response to your job posting for clinical geneticist, I am including this letter and my resume for your review.

In the previous role, I was responsible for support in research projects with multidisciplinary teams such as genomics, molecular biology, toxicology, and pathology to bring discovery candidates into development.

Please consider my qualifications and experience:

- Contribute to consolidated report development for quality control purposes
- Develop physician education curriculum
- Supervise genetic counselors
- Participate in evaluation and refining of testing panels offered by the laboratory as needed
- Drive adoption of genomic interpretation and reporting software by bringing a clinical perspective to shaping the software requirements gathering and prioritization process
- Embed with software development teams to represent the clinical user and contribute toward shaping the functionality of our clinical interpretation and reporting software
- Train internal support teams on the adoption and use of our end to end clinical sequencing and software solutions
- Be willing to work in a fast paced, competitive environment, and hold a strong record of successful delivery of complex projects under tight timelines

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Rowan Nikolaus
