

Clinical Research Scientist Cover Letter

3673 Salena Course
Lannyhaven, NV 52567

Dear Bellamy Witting,

I submit this application to express my sincere interest in the clinical research scientist position.

Previously, I was responsible for clinical input to protocol/study team for monitoring guidelines, statistics analysis plans, informed consent documents, clinical review forms, data edit checks, data quality planning, as needed (ultimately oversees work of protocol/study team).

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Previous experience in immunology preferred
- Knowledge of medical literature and technology assessment evaluation methods
- Knowledge of local and national health care environment and trends
- Knowledge of CPT and ICD-9 coding helpful
- Experience with genetic (ie RNAi and cDNAs) and pharmacological
- Experience working with chemists, in vitro and in vivo pharmacologists to develop and utilize assays in support of the development of small molecules for target validation and as part of compound lead optimization for the development of novel therapeutics is highly desirable
- A demonstrated track record in the development and implementation of functional genomics strategies to enable systematic investigation into mechanisms of tumorigenesis and drug resistance
- Extensive knowledge and experience in key areas of tumor biology including, but not limited to oncogenic signaling, tumor microenvironment, tumor immunology, metabolism, epigenetic deregulation or anti-apoptosis as evidenced by publication in peer-reviewed journals

Thank you for your time and consideration.
