

Clinical Research Scientist Cover Letter

181 Giuseppina Throughway O'Connell land, KY 95712

Dear Skyler Ferry,

I am excited to be applying for the position of clinical research scientist. Please accept this letter and the attached resume as my interest in this position.

In my previous role, I was responsible for clinical input to protocol/study team for monitoring guidelines, statistics analysis plans, ICDs, clinical review forms, data edit checks, data quality planning, as needed.

Please consider my experience and qualifications for this position:

- Professional mastery of clinical research concepts and processes and recognized expertise in clinical research protocol implementation and management
- Experience in analysis and interpretation of clinical data (safety and efficacy) and a working knowledge of biostatistics, GCP, and regulatory requirements for clinical studies
- Experience interacting with development operations (clinical ops, reg, QA) and clinical investigators
- Certification in Clinical Research (CCRA, CCRI, RAC) preferred
- Experience in interactions with FDA, regulatory agencies and the medical/scientific community
- Excellent written and verbal communication skills, with medical writing experience preferred
- In-depth, working knowledge of ICH E6 GCP Guidelines and FDA regulations for essential document requirements to support clinical studies
- Excellent written and verbal communication skills including good command of English language

I really appreciate you taking the time to review my application for the position of clinical research scientist.

Sincerely,
