

Clinical Research Scientist Cover Letter

453 Wendy Lights West Rolandoton, NC 72410-1354

Dear Rowan Ankunding,

I submit this application to express my sincere interest in the clinical research scientist position.

Previously, I was responsible for oversight of and insights into trial activities (e.g., trends in protocol compliance, enrollment, monitoring deviations, data quality) to principal investigators and support staff, and study sponsor management and leadership staff, including Institutional Review Boards/Ethics Committees/Research Ethics Committees, Clinical Operations.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Excellent computer skills (Windows, Outlook, MS-Excel, MS-Word, Adobe Standard or Professional)
- Strong problem solving and detail orientation skills
- Minimum BS in life science, nursing, or other related medical field
- PhD in a science discipline
- Be familiar with medical terminology, to include common medical and scientific abbreviations, and have knowledge of commonly used concepts, practices, and procedures within field of study
- Demonstrated superior organization and clinical management skills
- Comprehensive knowledge of a technological field
- Proficient knowledge of GCP/ICH, drug development process from discovery to registration, study design, statistics, clinical operations

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,
