Cloud Security Cover Letter

7317 Emanuel SquaresWunschland, NV 25382-5410

Dear Alexis Bauch,

I submit this application to express my sincere interest in the cloud security position.

In the previous role, I was responsible for subject matter expertise on architecture, authentication, and systems security based on a clear understanding of our cloud engineering stack, services, and data flow.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Understanding of and experience in cloud services, including SaaS, PaaS, IaaS, public, private and hybrid cloud environments, cloud access security brokers
- Understanding of a broad set of information security best practices and technologies that apply to cloud services (e.g., application security, risk management, data protection, encryption, identity and access management, logging and monitoring, security governance, network security) with a focus on with a focus on virtualization and cloud
- Experience performing technical risk assessments of third party service providers to validate evidence of security control requirements, identify security control gaps and management of security control gap remediation
- Experience planning, deploying and managing cloud-based solutions, such as Office 365
- Awareness of security incident response principles and tactics as it relates to cloud environments
- Cloud security certified CCSP or CCSK
- Work with a development team to implement and train developers and deployment engineers on how to effectively architect cloud based software solutions to meet the needs of customer requirements spanning globally

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Drew Hettinger
