Cloud Security Cover Letter

7556 McCullough RoadAltonmouth, VA 59251-7968

Dear Charlie Borer,

I would like to submit my application for the cloud security opening. Please accept this letter and the attached resume.

In the previous role, I was responsible for cost Visibility using cost control and reporting tools such as Cloudability, Cloud health, Cloud native budget and alerting, AWS Billing and Cost Explorer, GCP Billing, etc.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Expertise in creating technical documentation of Cloud Architecture, Design, Use cases and Test cases
- Professional Certifications, CISSP, CISA, CISM, CEH, CCNP, CCSP, or equivalent and Product Certification are welcome
- Experience in projects related to cloud security
- Experience in projects related to the core security domains
- Experience with Agile development and participating in CI/CD pipelines
- Experience with automated dev-ops technologies
- Strong knowledge in web protocols, multiple operating systems, hypervisors and distributed systems architecture
- In depth understanding of how to define and enforce policies for multi-tenant environments, firewall VM rules, file integrity monitoring, hypervisor access control, isolation, secure state management for VMs, encryption services and key management integration, and security logging and monitoring

Thank you for considering me to become a member of your team.

Sincerely,

Story Willms
