Cloud Security Cover Letter

346 Crooks BrooksSouth Malcomfort, TN 00274-9598

Dear Cameron Bins,

I submit this application to express my sincere interest in the cloud security position.

In my previous role, I was responsible for security assurance over cloud implementations, including AWS, Azure and UK Cloud.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Running validation tests on a variety of products in order to understand what current security measures are in place and pinpointing where the vulnerabilities are
- Reporting vulnerabilities to various teams on various products
- Cloud experience � AWS preferred
- Puppet or Ansible
- Experience performing static analysis and security code reviews
- In depth knowledge of the security related technologies, including but not limited
- Interest in working on a broad range of IT projects (Security, VoIP, Database, Network, IaaS, automation)
- Advanced knowledge of IT security controls

Thank you for your time and consideration.

Sincerely,

Armani Smith
