Cloud Security Cover Letter

879 Milan ForgeWest Dirk, SD 36905-3881

Dear Max Oberbrunner,

I submit this application to express my sincere interest in the cloud security position.

In the previous role, I was responsible for cloud security engineering for AWS and Azure.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Identify, prioritize, engage on, and influence a wide variety of cloud computing policies and initiatives in the U.S. and internationally
- Develop collateral and enable field teams to educate and upskill policy makers and other public sector influentials on cloud security policy issues
- Represent AWS and the interests of cloud service providers in a diverse range of private and public sector fora
- Seeking a specialist on AWS cloud security including cloud trail & cloud watch logs, config audit and notification using AWS config, IAM and federation, security configurations within cloud formation, manage an EC2 instances of Splunk for AWS to pull in logs and activity from multiple different accounts into a single governance account
- This person would also need to train additional operations staff and participate in discussions around moving data/systems to cloud
- Palo Alto , Splunk, Ingenix experience would be great to have but they would need to learn asap if they don't have it
- Applicable security certifications such as GWAPT, CSSLP, CISSP, CISA, CCSK, CCSP
- Deep knowledge of AWS, Azure and Google cloud technologies

Thank you for taking your time to review my application.

Shae Halvorson
