Cloud Software Developer Cover Letter

907 McCullough HarborGlennchester, MT 22184-5222

Dear Emery Pagac,

Please consider me for the cloud software developer opportunity. I am including my resume that lists my qualifications and experience.

Previously, I was responsible for a Linux container perspective during discussions that can help contribute to solving z/OS Containers design questions.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Good knowledge of software defined infrastructure concepts and patterns
- At least 3 months experience in JavaScript Development
- At least 3 months experience with HTML/CSS
- Familiarity with Dojo, Bluemix, Swagger
- Participle in Architecture, Planning and Execution and Maintenance
- Experience in application development using server-side Java in context of relational databases
- Adept at leveraging the right data structures and algorithms
- Deep experience with highly concurrent programming

Thank you for your time and consideration.

Sincerely,

Marion Cummings
