Cloud Software Developer Cover Letter

17670 Leo LakeLake Layne, GA 06265

Dear Denver Botsford,

Please consider me for the cloud software developer opportunity. I am including my resume that lists my qualifications and experience.

Previously, I was responsible for fanatical support for our web applications running in production by measuring error rates, fixing defects, and helping turn common customer errors into better experiences.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Extensive experience with Java's threading model, the executor framework and locking patterns for highly concurrent programs
- Adept at leveraging right data structures and algorithms
- Have a great attitude and is a team player
- Strong experience on Java, Groovy, Go or equivalent language
- Microservice or other distributed architectures
- Working experience on Git and build tools
- Reactive or message driven architecture experience
- Experience designing and developing performance optimized, high volume applications

Thank you for taking your time to review my application.

Sincerely,

Zion Wolff
