Cloud Software Developer Cover Letter

2676 Smith SpursPort Leanberg, ND 88464-7695

Dear Lennox Boyle,

Please consider me for the cloud software developer opportunity. I am including my resume that lists my qualifications and experience.

In my previous role, I was responsible for professional services/consultation for customer solution design, installation and training for onboarding customers for Verifone hosted service or for customer hosted service.

My experience is an excellent fit for the list of requirements in this job:

- Hands-on experience working with a relational database technology
- Hands-on experience with either the Git Source Control System, Visual Studio Online or Team Foundation Server
- Hands-on experience with developing Platforms-as-a-Service applications on either Microsoft Azure or Amazon Web Services
- Hands-on experience with developing solutions using NoSQL technologies like MongoDB, AWS DynamoDB or Azure DocumentDB
- Conversational understanding of DevOps methodologies and concepts
- Understands Test-driven development (TDD) and can write unit tests in a unit testing framework
- Hand on Experience in the design and development of cloud-native distributed applications that leverage Microservices, ReST APIs, API Gateways, relational and NoSQL stores and loosely coupled messaging
- Hands on experience developing scalable solutions on Microsoft Azure PaaS, IaaS deployment and Data management features or AWS

I really appreciate you taking the time to review my application for the position of cloud software developer.

Sincerely,

Max Kessler
