

Cloud Cover Letter

130 Wilton ParkWest Natishastad, WV 17710-6849

Dear River Ebert,

I submit this application to express my sincere interest in the cloud position.

Previously, I was responsible for mentoring and training to other members of the team on Azure or AWS solutions.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Analysis of open vacancies and hiring reports which are further used for cost control measures by top management
- Experience in business process analysis, requirements development
- Working knowledge of application development life cycle
- Working knowledge of business improvement process and industry best practices
- Or other enterprise database software
- Familiarity with Ansible and orchestration of system administration tasks
- Proven experience in big data and analytics architecture working with Micro services, SOA, Big Data systems (Cassandra, Hadoop, Spark, Kafka)
- Agile tools, process and mindset

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Skyler Bauch
