ColdFusion Developer Cover Letter

348 Bradley SquareKochside, NE 35373-7501

Dear Emery Jacobson,

In response to your job posting for coldfusion developer, I am including this letter and my resume for your review.

Previously, I was responsible for design and development to be in compliance with Section 508 standards.

My experience is an excellent fit for the list of requirements in this job:

- Experience with frameworks such as MachII and Fusebox
- Experience rapidly learning and interpreting legacy code
- Design, code, deploy, and test applications according to requirements
- Perform as the technical expert with thorough understanding of web-based applications
- Full Stack development strongly preferred
- ColdFusion strongly preferred
- SQL (T-SQL) strongly preferred
- Strength in custom web development technologies, jQuery, CSS, AJAX and T-SQL

Thank you for considering me to become a member of your team.

Sincerely,

Shiloh Quigley
