

Communications Engineer Cover Letter

8822 Eli Corner Russellburgh, WV 05247

Dear River Batz,

I submit this application to express my sincere interest in the communications engineer position.

Previously, I was responsible for necessary support for the University DNS and DHCP infrastructure.

Please consider my qualifications and experience:

- Knowledge of on-board digital channelization and beamforming
- Knowledge and understanding of the testing aspects for communications equipment, communications payloads and spacecraft communications capabilities
- Good knowledge and understanding of satellite design, and assembly integration & test methodology
- Personal drive to take the organization as far as it can go
- Courage to act upon convictions
- Flexibility to travel and work periodically at satellite manufacturer facilities, worldwide
- Acts within her or his circle of competence and knows the boundary
- Knowledge of the Microsoft Office Suite (Access, Excel, Word, Outlook, and PowerPoint) and CADD software related to capital projection construction and design

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Shiloh Bradtke
