

# Communications Engineer Cover Letter

2755 Linette RestLanestad, VA 62542

**Dear Skyler Christiansen,**

I am excited to be applying for the position of communications engineer. Please accept this letter and the attached resume as my interest in this position.

In my previous role, I was responsible for network infrastructure support and set up of DNS, DHCP entries.

Please consider my qualifications and experience:

- Participate in system safety analyses and provide input into system test and validation activities
- Provide technical support to Systems and Software Engineers to assist with development of new system architectures or technologies
- Provide technical assistance to ensure all RF products meet regulatory requirements for both domestic and international applications
- Experience with developing and evaluating security documentation for communication systems
- Knowledge of DIACAP or the RMF
- Knowledge of DoD information assurance policies, directives, and STIGs for communication systems
- Certified Ethical Hacker or CISSP Certification
- Experience with systems engineering methods and processes in order to perform SATCOM system analysis and evaluations for both commercial and military systems

**Thank you in advance for taking the time to read my cover letter and to review my resume.**

Sincerely,

Frankie Lockman
