

Computer Security Specialist Cover Letter

153 Wuckert Flats
Oraleeton, SD 86378

Dear Emery Ward,

I would like to submit my application for the computer security specialist opening. Please accept this letter and the attached resume.

Previously, I was responsible for information assurance support for the development and implementation of security architectures to meet new and evolving security requirements.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Experience with providing clients with technical support, analysis, and recommendations, developing tactics, techniques, and procedures (TTPs), and establishing reporting criteria, structure, and operational reports
- Contractors will register and arrange to attend the COMSEC Managers Course training within three months of contract start
- Conduct Low System Security Control Assessments
- Technical competencies in information assurance and security relevant to the analysis, design, and development of security features policy and controls for regulatory requirements such as FISMA (NIST guidelines), HIPAA, and the Privacy Act
- Knowledge of networks, data center, and end user device security guidelines and industry "best practices"
- Knowledge of IT enterprise security scanning, threat remediation, penetration testing as directly applicable to IT data processing complex with high sensitivity and personal identification/clinical systems (HIPAA) requirements
- Knowledge in establishing and maintaining cooperative working relationships with other employees, vendors, and organizations
- Experience in a large inter-networking or distributed computing environment

Thank you in advance for taking the time to read my cover letter and to

Sincerely,

Alexis Russel
