

Consultant, Salesforce Cover Letter

3105 Raymond MountainPort Anton, TN 32149

Dear Hayden Smitham,

In response to your job posting for consultant, salesforce, I am including this letter and my resume for your review.

Previously, I was responsible for ongoing architecture review and design support to ensure all areas of IT are implementing solutions consistent with the target architecture.

Please consider my qualifications and experience:

- Demonstrating strong knowledge of enterprise issues related to IT architecture
- Design and implementation of real-time and batch integration with Salesforce and other legacy systems using REST / SOAP and Bulk APIs or Any Tool/ESB (Informatica/Mules/CastIron)
- Classic to Lightning Migration and awareness about challenges and considerations for migration
- Using consulting skills, business knowledge and SFDC CRM experience to lead business / functional discussion with the client and internal teams (design, build, test teams)
- Understanding client's business challenges and offering solution to address using salesforce.com platform/ offerings
- Provide experience in designing workflow rules to implement business processes
- Being familiar with executing system and user acceptance testing, user adoption, managing change and training methods
- Hands-on experience in Salesforce Community Cloud, Service Cloud, and Lightning

Thank you in advance for reviewing my candidacy for this position.

Sincerely,
