

# Cyber Security Engineer Cover Letter

2006 Reilly MissionSouth Ernie, UT 59596-1805

**Dear Blake Cronin,**

I would like to submit my application for the cyber security engineer opening. Please accept this letter and the attached resume.

In my previous role, I was responsible for daily operational implementation of Cyber Security requirements in support of design, testing, documentation, integration, administration, and management of Cyber Security mitigation measures.

Please consider my qualifications and experience:

- Experience with security device installations, configuration and troubleshooting (e.g., firewall, IDS/IPS)
- Experience with scripting and application development
- Operate and drive improvement in the global penetration testing programme, planning tests, managing logistics and pre-requisites, reviewing results, managing remediation and arranging re-testing
- Operate and drive improvement in the security of DAN's network infrastructure, developing and enforcing standard configuration, governing access control lists and managing network security appliances
- Develop and maintain our SIEM capabilities
- Review alerts and launch deeper investigations where appropriate
- Develop new correlation rules and refine existing rules
- Maintain and support the SIEM platform, including managing future growth

**I really appreciate you taking the time to review my application for the position of cyber security engineer.**

Sincerely,

Greer Ritchie
