

Cyber Security Engineer Cover Letter

31445 Song Trafficway North Carline, MS 87762-4381

Dear Shae Schowalter,

I am excited to be applying for the position of cyber security engineer. Please accept this letter and the attached resume as my interest in this position.

In the previous role, I was responsible for cyber security guidance, governance and oversight within the assigned IT environments to ensure system availability, confidentiality, integrity and maintain compliance with appropriate regulation(s).

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Experience with VA Directive and Handbook 6500, Information Security Program
- Experience securing systems or environments that process personally identifiable information (PII) or protected health information (PHI)
- Relevant security certifications such as CISSP, ISSEP, SSCP, CAP, or GSE
- Working where the team is divided in multiple locations (Denver, CO and Tampa, FL)
- Key IT team member, whose focus on ensuring the job is done right and on time enables the team to always reach its goals
- Exposure to application penetration testing and automated code review tools
- Exposure to web application firewalls
- Cloud Certification - CCSK, AWS

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Denver Gleason
