

Cyber Security Engineer Cover Letter

1037 Daugherty PointLednermouth, ID 00528-8076

Dear Dylan Doyle,

I submit this application to express my sincere interest in the cyber security engineer position.

In my previous role, I was responsible for guidance to management on current cyber security threats and recommendations to protect corporate assets and brand image.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Experience with Cyber Protection Teams preferred
- Experience in Network Architecture preferred
- Research, evaluate and design cutting edge enterprise security DLP solutions
- Drive Proof of Concept and cutting edge technology projects to mature NYC's Cyber defenses on DLP solutions
- Implement and design overarching solution for all units of DOF
- In-depth experience with industry standard DLP solution in an enterprise environment
- Experience with architecting industry standard DLP Platforms
- Experience analyzing DLP events and reports

Thank you for considering me to become a member of your team.

Sincerely,

River Dickens
