

Cyber Security Engineer Cover Letter

69746 Berge PathWardhaven, CT 29257-4415

Dear Rowan Gutmann,

Please consider me for the cyber security engineer opportunity. I am including my resume that lists my qualifications and experience.

Previously, I was responsible for recommendations on developing cyber security strategies, conducting reviews of existing technologies and systems cyber security implementation, reviewing applicable guidance/requirements.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Prepare and maintain documentation for security procedures, processes and standards
- Understand the key concepts, elements and objectives of an enterprise security programme
- Understand the relationships between key security controls (policies, anti-malware, firewalls, etc) and the risks they mitigate
- Have strong technical IT knowledge, including a good general understanding of networking, firewalls, penetration testing tools and techniques, and security incident management
- Have some knowledge of programming and/or scripting languages
- Proficient in MS Office suite applications for data analysis, reporting, presentations and collaboration
- Information System Security Engineer (ISSE) / Information Assurance System Architecture and Engineering (IASAE) experience
- Able to obtain an Information Assurance (ISSE/IASAE) Level III Certified Information Systems Security Professional (CISSP) or equivalent DoD 8570.01m

Thank you in advance for taking the time to read my cover letter and to review my resume.
