

Cybersecurity Manager Cover Letter

22411 Terry FallLake Michikoport, IN 79401

Dear Justice McLaughlin,

In response to your job posting for cybersecurity manager, I am including this letter and my resume for your review.

Previously, I was responsible for technical expertise and leadership to partners, IT management and other infrastructure staff in, implementation and operational aspects of appropriate information security identity access management procedures and products.

Please consider my experience and qualifications for this position:

- Collaborate with Cybersecurity colleagues and other IT-Risk related organizations on roles and responsibilities for managing risk to the Cybersecurity organization itself
- CISA certification or willingness to pursue
- Experience in managing multiple projects/programs simultaneously in a systems engineering, change management, and business transformation context
- Experience in the industrial or power automation sector is strongly preferred
- Strong business acumen, value added services or product strategies
- Experience with Navy staff as military or civilian in Joint Staff, OPNAV, or Navy SYSCOMs
- Certified Information Systems Security Manager (ISSM) Level II Certification
- Prior experience in a Cybersecurity project or program management role

I really appreciate you taking the time to review my application for the position of cybersecurity manager.

Sincerely,

Jordan Bins
