

Cybersecurity Manager Cover Letter

80434 Hope RueEast Isadora, NC 66562

Dear Sam Conn,

I am excited to be applying for the position of cybersecurity manager. Please accept this letter and the attached resume as my interest in this position.

Previously, I was responsible for technical guidance to other members of the Identity and Access Management/ Security team in managing technologies such as vulnerability assessment tools, identity and access management, web content filtering, VPN / two factor authentication solutions.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Experience with eDiscovery, forensics, or incident response
- Experience with Profit and Loss (P&L) management and portfolio-level management
- Knowledge of federal, state, local and international legislation and regulatory guidance for Cybersecurity and data protection
- Experience with providing IT support, including Cyber analysis support to the US government
- Experience in the defense or intelligence community
- Knowledge of the IC's information technology environment (ITE)
- Possession of excellent oral and written communication skills, including articulating and presenting highly technical information in a comprehensible manner to all levels of management and staff
- Certified Information Security Manager (CISM), Certified Information Security System Professional (CISSP), GIAC Certified Incident Handler (GCIH), Certified Business Continuity Professional CBCP, or Master Business Continuity Professional MBCP Certification preferred

Thank you in advance for taking the time to read my cover letter and to review my resume.
