

# Cybersecurity Manager Cover Letter

42552 Gulgowski ViewStephanport, AR 30523

**Dear Robin Legros,**

I submit this application to express my sincere interest in the cybersecurity manager position.

In my previous role, I was responsible for subject matter expertise in the creation, editing, and management of rules and filters for specialized cyber security systems including but not limited to network and host-based IDS, IPS, firewall, web application firewall, proxy and SIEM systems.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Demonstrated competency in Computer Science
- Understanding of software design and development principles, including preferably C#, ASP.Net, ASP.Net MVC, Web Services (SOAP), Web API (REST), Visual Studio, AngularJS framework, and Entity Framework
- Understanding web application and design concepts
- The task will require extensive knowledge of the NASA services, Code 700 Engineering and Security policies and practices in support of mission-critical systems, and GSFC/WFF Infrastructure architectures
- Proven track record of effective teamwork skills and demonstrated strong written and verbal communications skills
- Experience managing large-scale projects involving dozens of product lines and multiple business units
- Experience working with multiple stakeholders in a variety of function at multiple levels including executive management
- Understanding of basic security concepts

**Thank you for taking your time to review my application.**

Sincerely,
