

# Data Researcher Cover Letter

729 Schultz SpursMaryberg, ND 18450

**Dear Emery Walter,**

I would like to submit my application for the data researcher opening. Please accept this letter and the attached resume.

Previously, I was responsible for expert content for data measurement and reporting projects by using SQL for data profiling and analytics related to the 360 Data environment.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Substantive background in applied statistics
- Familiar with machine learning methods
- Experience with Tableau or similar visualization tool
- Prior finance or data internship experience a big advantage
- Comfortable working with technical equipment, Mac OS, Windows OS - Hands-on experience with one-on-one session moderation with participants
- Good sense of humor, a positive attitude, and great teamwork skills
- BS, MS, or PhD in Computer Science, Robotics, Electrical & Computer Engineering, or related fields specializing in data science/analytics, machine learning, computer vision, and/or perception
- Possess extensive, demonstrated C/C++, MATLAB, or Python programming, strong mathematical foundation & problem-solving skills

**Thank you in advance for taking the time to read my cover letter and to review my resume.**

Sincerely,

Oakley Stokes
