

# Data Researcher Cover Letter

94707 Carol CornerMadalinebury, AK 62948

**Dear Royal Effertz,**

I submit this application to express my sincere interest in the data researcher position.

Previously, I was responsible for best practice guidance and support including; data profiling on designated data sets, conduct analysis on results and provide recommendations on rule development, configure and code data quality validation rules in designated tools (SQL and/or IBM InfoAnalyzer), reporting -schedule, review and packaging of results for business.

Please consider my experience and qualifications for this position:

- Hands-on experience with state-of-the-art algorithms for analysis of various types of data
- Experience with fast prototyping in MATLAB and/or Python
- Willingness to work well in a team environment
- Financial industry experience is strongly preferred, with direct buy-side asset management experience ideal
- Well organized and able to prioritize and multi-tasking
- Strong understanding of accounting rules such as IFRS and GAAP
- Experience creating and presenting solutions to complex equity data issues
- Experience working independently on projects with little managerial supervision

**Thank you for considering me to become a member of your team.**

Sincerely,

Baylor Hahn
