

Data Science Cover Letter

754 Block GardensSouth Ashli, KS 49541

Dear Skyler Williamson,

I am excited to be applying for the position of data science. Please accept this letter and the attached resume as my interest in this position.

In the previous role, I was responsible for technical leadership on latest machine learning/deep learning methods and adoption of new analytical tools.

Please consider my qualifications and experience:

- Experience with data modeling, data warehousing tools, and data bases
- Assist with lesson planning and creation
- Exceptional programming skills in platforms
- Advanced Level working knowledge in statistics, finance, economics (with a focus of applied econometrics), applied and computational mathematics, and other disciplines in physical sciences or engineering that require heavy use of computational mathematics and/or statistical techniques
- Comfortable explaining complex mathematical concepts to others in a version tailored for the audience
- Experience in at least one programming language (such as Perl, python, C/C++, java) or data extraction language (SQL) or higher level language (such as R, SAS)
- Experience developing strategies that have enabled wins with key marketing or advertising partners
- Deep understanding of the technical aspects of current Data Analytics platforms (related to Digital and/ or TV)

Thank you for considering me to become a member of your team.

Sincerely,

Charlie Padberg
