

Data Science Cover Letter

56171 O'Connell StreetNew Berneice, ND 60578-1185

Dear Haven Jacobi,

Please consider me for the data science opportunity. I am including my resume that lists my qualifications and experience.

Previously, I was responsible for guidance and hands-on help for data and solution development (SQL, Python, ML).

Please consider my experience and qualifications for this position:

- Decides data science methodologies, algorithms and more complex statistical methodologies should be applied through the use of statistical programming languages and tools
- Partners with domain experts to verify model capabilities and translate modeling outputs from statistical inferences into business language
- Partners with IT resources to enable appropriate data flow/data model, development using appropriate tools/technology, rapid prototyping and informs the design of analytical products
- Coach, develop and mentor employees (team) on data science tools and methodologies
- C/C++, Python, or JAVA
- Plotly and other data visualization tools
- Google Analytics / Big Data
- Hadoo / Spark

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Briar Huels
