

# Data Solutions Cover Letter

44343 Rolf CrestNew Silas, DE 96608-8621

**Dear Haven Ullrich,**

In response to your job posting for data solutions, I am including this letter and my resume for your review.

Previously, I was responsible for support to implement and develop data standards, facilitate data standardization workshops, facilitate data governance council meetings and support continuous improvement efforts to expand data governance framework.

My experience is an excellent fit for the list of requirements in this job:

- Knowledge of Global Markets activities
- Understanding of the financial aspects of fixed income securities
- Experience in fixed income referential data
- Take technical ownership of projects, enhancements and improvements on Data Warehouse and other Data Solutions systems, partnering with other senior team members within a multi-skilled project team
- Contribute to the development of the BI platforms and proactively drive the creation and adoption of standards and best practice and re-enforcing this through rigorous code review sessions
- Contribute to the development and refinement of our governance structures including Source Control and Release Management techniques
- Exceptionally high standard of development skills across the entire Microsoft BI Stack
- Architecture of solutions that subscribe to robust and agile technical frameworks and standards

**Thank you for considering me to become a member of your team.**

Sincerely,

Story Wyman
