

Data Strategy Analyst Cover Letter

49780 Lehner CirclesLake Lou, MI 01717-3330

Dear Sam Wilkinson,

I would like to submit my application for the data strategy analyst opening. Please accept this letter and the attached resume.

Previously, I was responsible for leadership, establish protocol, processes and procedures and administer data warehouses including, but not limited to designing data warehouse objects, creating and maintaining tables, views, indexes, functions, stored procedures, packages and scheduled events.

Please consider my qualifications and experience:

- Manage key aspects of a large data migration from one warehouse into another, ensuring no loss of service to end-customers through creative solution and problem-solving
- Advocate for, recommend on, and periodically even create "application-ready" summaries of data to test new tool solutions and assist with unusual data requests
- Good understanding between data and applications
- Relevant experience with data warehousing and modeling
- Able to generate coherent and intelligent frameworks to convey own insights
- Relevant work experience in Information Management roles, including technical experience and business-facing experience
- Experience with SQL for Sybase/DB2 databases
- Fluent German speaker (native preferred), fluent in English

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Lennox Stiedemann
