

Designer / Developer Cover Letter

715 Quintin Grove Lake Tamekia, NJ 34386

Dear Marion Harvey,

In response to your job posting for designer / developer, I am including this letter and my resume for your review.

In my previous role, I was responsible for specialized expertise / guidance in selecting learning technology where applicable that will provide innovative solutions and meet project learning objectives.

Please consider my qualifications and experience:

- Design and develop websites and user interfaces for web-based applications
- Provide front-end architecture and aesthetic thought leadership
- Design and build innovative user experiences utilizing programming languages such as HTML, CSS, and JavaScript, meeting deadlines and according to specifications
- Develop and present wireframes, mockups, and storyboards
- Deliver high-quality websites and other digital projects with exceptional UX/UI that meet current coding standards and cross-browser compatibilities
- Act as the subject matter expert for our CMS (Sitecore)
- Strong in programming languages such as HTML, CSS, and JavaScript
- Be able to translate high-level requirements into interaction flows and transform them into intuitive, functional and responsive designs that are in HTML/CSS templates

I really appreciate you taking the time to review my application for the position of designer / developer.

Sincerely,

Sawyer Kuhn
