

Developer / Engineer Cover Letter

50738 Mammie ForgeLoyceton, AZ 14961-6988

Dear Brooklyn Greenfelder,

I am excited to be applying for the position of developer / engineer. Please accept this letter and the attached resume as my interest in this position.

In my previous role, I was responsible for coaching to the other developers on best practices in software engineering and configuration, continuously improve development standards.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Willingness to maintain and improve existing applications write new applications
- Develop innovative and evolutionary architectures
- Transform existing processes into industry-standard processes or be driven to exceed the industry standard practices setting new trends
- Opportunities to stay current
- Mentor and guide fellow team members as much as possible
- Experience with design and coding in web-services and REST API related technologies (SOAP, WSDL, XML, XSLT, REST, JSON, Swagger, API Gateways and API Management Portal)
- Experience with OO design and implementation practices with programming skills in Java, Javascripts
- Web API Virtualization technologies and familiarity with stubbed APIs

Thank you for considering me to become a member of your team.

Sincerely,

Reese Funk
