Developer / Engineer Cover Letter

69089 Price MissionAntonettehaven, UT 30670-5663

Dear Gray Zulauf,

In response to your job posting for developer / engineer, I am including this letter and my resume for your review.

Previously, I was responsible for hands-on leadership, coaching, mentoring, and software engineering best practices to internal software engineers to ensure the quality of their work meets standards.

My experience is an excellent fit for the list of requirements in this job:

- Experience on API Management products and technologies (IBM DataPower, Apigee, API Management,) preferred
- Knowledge of encryption and hashing technologies for securing Web APIs
- Functional and performance testing of Web APIs and knowledge of Web API testing tools (SOAPUI, JMeter)
- Splunk certification – Administrator or Architect
- Advanced Splunk Search Processing Language skills
- Network, Internet / Web technology working knowledge
- Proficient in object-oriented design and appropriate use design/architecture patterns
- Participate, or possibly lead, Proof of Concept activities

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Riley Schoen
