Developer Lead-Java Cover Letter

967 Ming BranchCristineshire, KY 69122

Dear Lennon Heller,

In response to your job posting for developer lead-java, I am including this letter and my resume for your review.

In my previous role, I was responsible for software security expertise to the engineering team for development of secure software programs as part of the sprints and Product Increments.

Please consider my qualifications and experience:

- Distributed Version Control Software such as Git and Bitbucket
- Build tools such as Gradle and Jenkins
- Experience with Core Java including J2EE, web services, SOAP, and RESTful API
- Experience with JavaScript and other front end technologies/libraries
- Interest in a lead role
- Experience coding in an Enterprise Java environment
- Experience with JSON, XML, UNIX/Linux, and AngularJS is helpful
- Motivated, agile and able to work independently in a fast paced team oriented environment

Thank you for considering me to become a member of your team.

Sincerely,

Avery Predovic
