

Developer Lead Cover Letter

6679 Anibal ForgeSouth Annalee, SD 86679-5646

Dear Corey Erdman,

I submit this application to express my sincere interest in the developer lead position.

In my previous role, I was responsible for technical leadership in analysis, documentation, definition and implementation of technology solutions that meet the business needs of the organization.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Experience with change management procedures and systems support experience
- Experience with robotics interfaces and direct software control of robotics
- Experience as a lead developer leading a team (at least a few individuals)
- Strong working knowledge of Java, latest Android SDK and core Android frameworks
- Strong working knowledge of ObjC, Swift, latest iOS SDK and core iOS frameworks
- Familiar with RESTful principles, API design techniques, and .NET
- Experience with packaging and publishing of mobile apps
- Examples of previous work on other native apps

Thank you for considering me to become a member of your team.

Sincerely,

Armani Morissette
