

Developer / Programmer Analyst Cover Letter

1566 Goodwin Branch
Jamilahaven, NM 99269-1065

Dear Sawyer Funk,

I would like to submit my application for the developer / programmer analyst opening. Please accept this letter and the attached resume.

Previously, I was responsible for technical and systems design expertise in the development of new and maintenance of existing SSRS reports.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Develop data-driven web based applications
- Build APIs
- Assist in related development activities such as configuration management, testing and deployments
- Create and maintain documentation, participate in knowledge sharing with the Abt technology community and support client demos as needed
- Understanding of API-centric architectures that combine front-end JavaScript frameworks such as Angular JS
- Experience with version control systems (Git or Mercurial) and project management tools such as JIRA
- Well versed in HTML, CSS (SASS)
- Solid experience writing JavaScript (jQuery)

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Sam Koss
