Dear Briar Mosciski,

In response to your job posting for developer / programmer analyst, I am including this letter and my resume for your review.

In the previous role, I was responsible for design leadership in large or complex data analysis of end to end Hadoop projects involving application development, migrations and additions to existing applications.

Please consider my experience and qualifications for this position:

- Focus on customer service and written/oral communication skills
- Has experience in requirements gathering, impact analysis and estimating development effort
- Has experience in all phases of the development lifecycle which includes planning, design, build (code and unit testing), testing (systems and integration testing), deployment
- Team player, proactive and self-starter
- Broad knowledge of software development and software testing methodologies along with change and configuration management practices
- Proficient in design and developing Java applications using the Spring Framework
- Experience working with a DBMS (DB2, Oracle, SQL Server, etc)
- Knowledge of common Javascript frameworks

Thank you for considering me to become a member of your team.

Sincerely,

Quinn Buckridge
