

Development Internship Cover Letter

387 Marylouise Pike
Port Kala, MO 88440

Dear Denver Muller,

I submit this application to express my sincere interest in the development internship position.

In my previous role, I was responsible for leadership, direction and supervision to the development team: project manager, team lead, business analyst, developers and QA for development processes: planning, software design, coding, testing, implementation, and maintenance.

My experience is an excellent fit for the list of requirements in this job:

- Competent and open-minded towards different respondents of all levels
- Gain experience and apply knowledge of food science, the product development process and operation of a wide variety of food processing/packaging equipment
- Work closely with product development scientists on a wide variety of value added food projects
- Previous food or meat processing experience is beneficial
- Strong interest in product development and product ingredients
- Good written and oral English communication, presentation and reporting skills
- Social media savvy and familiar with Facebook Live
- Potential for a full-time offer

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Corey Osinski
