

Development Support Cover Letter

732 Damion BrookWoodrowshire, WA 15117

Dear Stevie Lehner,

In response to your job posting for development support, I am including this letter and my resume for your review.

Previously, I was responsible for thought leadership on how the HIPAA/HITECH-compliance cloud services will help drive rapid change in the healthcare market, including transformation of healthcare-specific applications such as electronic medical record (EMR) platforms and patient image archive (PACs/VNAs), as well as other enterprise application suites with healthcare-specific offerings (SAP, Lawson, Kronos).

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- SQLLIMS or StarLIMS experience
- GxP, GLP, ITIL
- Knowledge of network topologies, firewalls, VPNs, and routing protocols, and working with the networking team to set up the necessary configurations
- Support networked laboratory computers / instruments and troubleshoot connections as needed
- Ensure equipment are cleaned/rinsed prior to release to maintenance
- Maintain current PO's with outside vendors
- Track and maintain process hose expiry database and order replacements as needed
- Track and maintain equipment logbook and calibration binders and review daily equipment check sheets and perform daily checks of certain process equipment

Thank you for taking your time to review my application.

Sincerely,
