

# Development Test Engineer Cover Letter

335 Mohammad Tunnel Darenhaven, GA 22831

**Dear Gray Connelly,**

I am excited to be applying for the position of development test engineer. Please accept this letter and the attached resume as my interest in this position.

Previously, I was responsible for executive thought leadership on developing and enhancing methodologies and practices for the application life cycle management in line with best practice and practical experience of continuous improvement.

Please consider my qualifications and experience:

- Experience on Relational Database and Java
- Design and build scalable automated test frameworks and test suites working across technologies
- Multi-lingual testing frameworks and automation experience
- Experience in Voice and Search Testing
- Architected and Developed Validation framework for proof of concepts (POC) and come up with Validation methodologies/BKMs
- Have good experience working with Virtual machines, developing Simulators/injectors
- Expertise in debug both at HW and SW level
- Very good communication and stake holder management

**Thank you for taking your time to review my application.**

Sincerely,

Oakley Hilll
