

# Development Test Engineer Cover Letter

8996 Harber Village Westtown, RI 32822

**Dear Parker Kessler,**

Please consider me for the development test engineer opportunity. I am including my resume that lists my qualifications and experience.

In my previous role, I was responsible for testing, validation, and sign-off for software product development and release readiness (covering both the product release cadence and the Agile sprint cadence).

Please consider my experience and qualifications for this position:

- Experienced in building automated software test infrastructure and tests – spanning test plan development, test infrastructure development, automated test suite development, use of constrained random tests, and test coverage analysis
- Experience with C and C++ with exposure to Java
- Highly proficient in at least one scripting language (ideally Python)
- Exposure to embedded software environments
- Exposure to Linux kernel or drivers
- Proficiency with continuous test, integration, and deployment technologies
- Proficiency with Git source control
- Familiarity of professional software engineering practices for the full software development life cycle, including coding standards, code reviews, source control management, build processes, testing, and operations

**Thank you in advance for taking the time to read my cover letter and to review my resume.**

Sincerely,

Phoenix Fisher
