Development Test Engineer Cover Letter

2755 Sherrell StreetNorth Gregorioborough, ID 32830-5860

Dear Riley Bergstrom,

I submit this application to express my sincere interest in the development test engineer position.

Previously, I was responsible for guidance and best practices for Continuous Integration and Continuous Test to agile development teams.

Please consider my experience and qualifications for this position:

- Fluent in C/C++ programming with demonstrable experience
- Working Knowledge of the Linux OS and the requisite development tool chain
- Knowledge of Optics, Lasers and Fiber Optic Communications
- Knowledge of robotics, MEMS, or precision motion sub-assemblies
- Effective communication skill with a priority of accomplishing team objectives
- Experience with Teradyne microFlex, LTX, and/or ETS88
- Demonstrated experience in high volume data analysis and DOE
- Fundamental understanding of electrical circuit design

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Justice Wolf
