

# Development Test Engineer Cover Letter

897 Nader CornerSchneiderberg, AL 49808-8721

**Dear Alexis Fritsch,**

I would like to submit my application for the development test engineer opening. Please accept this letter and the attached resume.

In the previous role, I was responsible for support to the Test Equipment and Facilities Engineering Manager on the development of an efficient test equipment development processes and procedures (including process improvement and continuous development).

My experience is an excellent fit for the list of requirements in this job:

- Experience with enterprise class storage solutions and environment
- Expertise in SATA, SAS, NVMe protocol and debug, including knowledge of relevant debug tools
- Knowledge of sound electrical hardware and software/firmware design principles and practices experience with configuration control and defect management tools
- Good knowledge in programming with C/C++, JAVA, OOP
- Follow SW validation procedures
- Activities defined by the VCycle process
- System Test level (Functional, Black box, In vehicle, etc)
- Expertise in Java (or C# or C++) and knowledge of scripting languages like PERL, JavaScript or Python

**Thank you for considering me to become a member of your team.**

Sincerely,

Baylor Waters
