Development Test Engineer Cover Letter

4505 Harris ManorsWaelchiberg, VA 23393

Dear Max Kilback,

I submit this application to express my sincere interest in the development test engineer position.

In my previous role, I was responsible for guidance to the project teams in the development of testing strategies, testing process and best practices.

My experience is an excellent fit for the list of requirements in this job:

- Test package generation for new products with higher complexity (software & hardware development)
- Test package optimization & sustaining and/or sub-cons technical support
- Participate in new tester platform benchmarking
- Enhance test package with Zero defects approach (IV leakage test, poka-yoke mixing, etc)
- Participation in CoP TE community and provide sharing with the worldwide TE community
- Contributes to success and share knowledge within project/team
- Test package buy-off and documentation
- Participate in new tester platform benchmarking and technical collaboration team (where applicable)

Thank you for considering me to become a member of your team.

Sincerely,

Corey Morar
