

Digital Design Engineer Cover Letter

460 Collin Square Lake David, IA 13542

Dear Ryan Halvorson,

In response to your job posting for digital design engineer, I am including this letter and my resume for your review.

In my previous role, I was responsible for guidance and oversight on concepts, copy and visual design to less senior members of the creative team.

Please consider my experience and qualifications for this position:

- Intuitive and analytical understanding of system level specifications
- Hands-on work involving RTL design, STA, LEC, LINT and CDC checks
- Experience with electronics test equipment - logic analyzers, oscilloscopes, communication bus analyzers
- Or Cadence Innovus
- Earlier experience with SoC Processor based architectures needed
- Basic understanding of mixed-signal circuits (op-amps, A/D's, D/A's, voltage references)
- Basic understanding of CMOS device structure and behavior
- Basic understanding of SPICE

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Rowan Simonis
