

Digital Design Engineer Cover Letter

854 Neomi OverpassErdmanhaven, WA 80403

Dear Story Hoppe,

I would like to submit my application for the digital design engineer opening. Please accept this letter and the attached resume.

In my previous role, I was responsible for technical expertise and direction through an understanding of technical architecture, quality, performance, scalability, reliability, availability, maintainability, and testability.

Please consider my experience and qualifications for this position:

- Knowledge of commonly used IC design tools
- RTL design and verification of DSP algorithms for wireless communications
- FPGA prototyping of wireless processing engines and integration with sensors and RFICs
- Develop low level SW components and FW ingredients for SoCs
- Knowledge of verification methodologies such as OVM or UVM
- Computer architecture and digital design background
- Currently in need of an Electrical Engineer to support new product development within the Space Products development team
- Experience with high-speed serial communication buses is an advantage

Thank you for your time and consideration.

Sincerely,

Dakota Rohan
