Digital Developer Cover Letter

38349 Simone ViewSouth Yurikochester, AZ 57888-2290

Dear Emerson Stroman,

I submit this application to express my sincere interest in the digital developer position.

Previously, I was responsible for technical support to database applications including, data conversion and data integration supporting back-end.

Please consider my experience and qualifications for this position:

- Extensive experience with semantic HTML, CSS and pre-processors like LESS or SASS
- Comfortable with design patterns and JavaScript best practices, OOP, MVC, MVVM
- Experience with modern web development toolkit
- Good understanding of UX principles and best practices
- Can create UI designs in Adobe Photoshop or Sketch
- SQL, NoSQL databases experience
- Implement visual designs and user interfaces in HTML/CSS/Javascript, including usage of frontend frameworks like JQuery
- Build frontend XHTML pages with CSS and Javascript to be compliant with web standards and Web Accessibility

Thank you for your time and consideration.

Sincerely,

Peyton Krajcik
