

Digital Developer Cover Letter

5360 Miller RouteKerlukemouth, CT 93607

Dear Ari Nolan,

Please consider me for the digital developer opportunity. I am including my resume that lists my qualifications and experience.

In my previous role, I was responsible for overall support and management of the technical infrastructure of servers, storage, back-up and disaster recovery for systemwide institutional repository and digital archives systems, with a current focus on Amazon Web Services.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- At least two successful large software project implementations on Salesforce
- Deep expertise and successful working experience with software Service Providers covering all phases of the systems development lifecycle
- Knowledge of tools which can support DevOps practices, including automated testing solutions, virtualised environment tools
- Experience building responsive, modular CSS with SASS that plays well across multiple browsers
- Interest and/or experience with emerging front-end technologies such as React, Vue, Angular
- Programming experience using client frameworks like Bootstrap, AngularJS
- Microsoft Certified Software Developer
- Experience developing online B2B Marketing websites

Thank you for considering me to become a member of your team.

Sincerely,

Stevie McKenzie
