

EHS Engineer Cover Letter

29290 Cris ExpresswayOzиеville, NC 08544

Dear Peyton Bergnaum,

I submit this application to express my sincere interest in the EHS engineer position.

In my previous role, I was responsible for site support in the area of environmental permitting, air compliance, incident investigation including root cause analysis, spill prevention plans, pollution prevention, hazardous waste, auditing, environmental training and etc.

Please consider my qualifications and experience:

- Experience or formal education with researching and interpreting regulations, permit compliance reporting, hazardous operations analysis and control, and training program structure and management
- Assisting in design reviews for new and modified facilities, processes, equipment and tooling for safety-regulated compliance to help ensure the safety of the employees and the process
- Performing worksite audits, inspections, and evaluations on the operating floor to identify hazards and ensure compliance with OSHA, federal, corporate, local, and general industry standards
- Work with other disciplines (e.g., Engineering, Operations, Environmental, Occupational Medicine, Maintenance,) to ensure implemented safety precautions are being followed
- Conducting safety surveillance of operations to ensure compliance to requirements and procedures
- Assisting in safety related training courses
- Assisting with Industrial Hygiene assessments for new chemicals (e.g., determine appropriate precautions and PPE requirements)
- Assisting in authoring and classifying chemical Safety Data Sheets (SDS) to meet the requirements of the OSHA Hazard Communication Standard, including elements of the Globally Harmonized System for Classification and Labeling of Chemicals (GHS)

Thank you for your time and consideration.

Sincerely,

Onyx Hauck
