

# EHS Engineer Cover Letter

371 Morar MissionDelorasborough, WI 36924-1812

**Dear Shae Mertz,**

I would like to submit my application for the EHS engineer opening. Please accept this letter and the attached resume.

In my previous role, I was responsible for technical recommendations to permit plant operation within state and federal government air and water pollution control requirements.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Proven success in developing, implementing and leading initiatives/project plans
- Supplier / Vendor Management, especially compliance and performance evaluation of day-to-day sustain support operations and contracted project deliverables including conflict resolution and escalation of potential shortcomings
- Assist operations in the development and execution of preventive maintenance plans
- Fully utilize preventive maintenance system and ensure adherence to preventive maintenance schedules
- Request quotes and negotiate service contracts
- Develop and implement equipment installation standards and monitor installations to assure they meet facility and safety standards
- Coordinate utility supply and connection to manufacturing equipment
- Provide engineering and technical support to make repairs, adding new features or functionality to new or existing equipment

**I really appreciate you taking the time to review my application for the position of EHS engineer.**
